

Cherrypicks Limited

I. Service Category (C) Cloud IT Services

Table 1: Cloud IT Services Items (Service items passing all General, Security and Technical Requirements)

Item Number	Item Description	Manufacturer
C00001	To do storage and hosting to Azure cloud platform: <ul style="list-style-type: none"> ● 1a) Virtual Machines x 2 [2 vCPU(s), 4 GB RAM; Linux – Ubuntu; 1 managed OS disks – 32 GB] ● 1b) Load Balancer x 1 ● 1c) SQL Database x 1 [DTU Purchase Model, Standard Tier, S3 - 100 DTUs, 250 GB included storage per DB] ● 1d) Cache for Redis x 1 [C1: Standard tier] Storage x 1 [1,000 GB Capacity] ● 1e) Content Delivery Network x 1 [500 GB Data transfers per month] 	Microsoft
C00002	To do storage and hosting to AWS cloud platform: <ul style="list-style-type: none"> ● 2a) Virtual Machines x 2 [2 vCPU(s), 4 GB RAM; Linux – Ubuntu; 1 managed OS disks – 32 GB] ● 2b) Load Balancer x 1 ● 2c) SQL Database x 1 [DTU Purchase Model, Standard Tier, S3 - 100 DTUs, 250 GB included storage per DB] ● 2d) Cache for Redis x 1 [C1: Standard tier] Storage x 1 [1,000 GB Capacity] ● 2e) Content Delivery Network x 1 [500 GB Data transfers per month] ● 2f) Included Trend Micro anti-virus software. 	Amazon Web Services
C00003	To do storage and hosting to Aliyun cloud platform: <ul style="list-style-type: none"> ● 3a) Virtual Machines x 2 [2 vCPU(s), 4 GB RAM; Linux – Ubuntu; 1 managed OS disks – 32 GB] ● 3b) Load Balancer x 1 ● 3c) SQL Database x 1 [DTU Purchase Model, Standard Tier, S3 - 100 DTUs, 250 GB included storage per DB] ● 3d) Cache for Redis x 1 [C1: Standard tier] 	Aliyun Cloud

Item Number	Item Description	Manufacturer
	<ul style="list-style-type: none"> Storage x 1 [1,000 GB Capacity] ● 3e) Content Delivery Network x 1 [500 GB Data transfers per month] ● 3f) Included Trend Micro anti-virus software 	

II. Government Public Cloud Related Services

Table 2.1 : Staff Service

Item No.	Description of Services	Staff Category
0001	<p>The Professional Service Package on running Azure platform included migration, storage and hosting, included:</p> <ol style="list-style-type: none"> 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support 	System Specialist
0002	<p>The Professional Service Package on running Azure platform included migration, storage and hosting, included:</p> <ol style="list-style-type: none"> 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support 	Project Manager
0003	<p>The Professional Service Package on running AWS platform included migration, storage and hosting, included:</p> <ol style="list-style-type: none"> 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support 	System Specialist
0004	<p>The Professional Service Package on running AWS platform included migration, storage and hosting, included:</p>	Project Manager

	<ul style="list-style-type: none"> 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support 	
0005	<p>The Professional Service Package on running Aliyun platform included migration, storage and hosting, included:</p> <ul style="list-style-type: none"> 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support 	System Specialist
0006	<p>The Professional Service Package on running Aliyun platform included migration, storage and hosting, included:</p> <ul style="list-style-type: none"> 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support 	Project Manager

Table 2.2 : Installation and Maintenance Service

Item No.	Description of Services
0001	Architecture Design Services, Deployment services and Managed services for installation and maintenance on the Azure platform
0002	Architecture Design Services, Deployment services and Managed services for installation and maintenance on the AWS platform
0003	Architecture Design Services, Deployment services and Managed services for installation and maintenance on the Aliyun Cloud platform
