

Success Story of Project Completed for the Government

Date 01 Feb 2023

Project Owner: Registration and Electoral Office

Project Name (in English): Independent Testing Service and Security Risk Assessment & Audit Service for the Electronic Poll Register (EPR) System of the Registration and Electoral Office (REO)

Project Description:

Independent Testing Service

To perform independent testing (including function test, system integration test, stress test, load test, performance test, contingency & recovery test, reliability test, security test, procedural/operational test) on the new Electronic Poll Register (EPR) system for issuance of ballot papers to voters at all polling stations used in the 2021 Legislative Council General Election (LCGE), 2021 Election Committee Subsector Ordinary Elections (ECSSOEs) and 2022 Chief Executive Election (CEE).

Security Risk Assessment & Audit

To perform the security risks assessment for the Electronic Poll Register (“EPR”) system, identify and recommend safeguards with the aim of strengthening the security protection of the system and the related data to an acceptable level.

To perform security audit to determine the state of the existing protection and to verify whether the existing protection has been implemented effectively.

To review the security status of the system(s) and data to ensure that all risks identified in the security risk assessment and security audit have been mitigated or reduced to an acceptable level.
